RE: MEDICALLY NECESSARY DENTAL PROCEDURE FOR DISABLED OR MINORS – SECTION 6060.6 OF TITLE 36  

DATE: JANUARY 12, 2010  

PURPOSE OF THIS BULLETIN  

Section 6060.6 of Title 36 requires certain health benefit plans to provide coverage for anesthesia and hospital and ambulatory surgical center expenses in connection with medically necessary dental procedures when a covered person meets specific criteria. This bulletin clarifies the position of the Insurance Department when coverage is medically necessary for dental procedures for children eight years old or younger.  

Subsection A of Section 6060.6 of Title 36 of the Oklahoma Statutes requires health benefit plans providing hospitalization benefits to also provide coverage for anesthesia expenses and hospital and ambulatory surgical center expenses associated with any medically necessary dental procedure when a covered person is either:  

1. Severely disabled, or  
2. A minor who is eight years of age or under, and who has a medical or emotional condition which requires hospitalization or general anesthesia for dental care.  

As written, the statute does not refer to a behavioral condition of a child eight or younger, nor does the statute require a diagnosis of a medical, behavioral or emotional condition of the child in order to receive covered benefits for anesthesia or expenses associated with medically necessary dental procedures. The statute refers to a child eight years or younger who has an emotional condition requiring hospitalization or anesthesia. What constitutes an “emotional condition” is a broad term which can encompass a variety of meanings.
While the emotional development of child can change rapidly as the child matures, the intent of the law appears to be to ensure that a young child is not unnecessarily traumatized or physically harmed by a major dental procedure. The physical and emotional safety of the child is of the utmost importance. Reason dictates that a young child is not of sufficient emotional development to undergo medically necessary dental procedures involving time and restraint.

Therefore, it is the position of the Insurance Department that the intent of the statute is that health benefit plans falling under the purview of Section 6060.6 of Title 36 provide coverage for anesthesia expenses and hospital and ambulatory surgical center expenses associated with any medically necessary dental procedure for minors under the age of eight, taking into consideration the professional judgment of the practitioner treating the child concerning the use of anesthesia in conjunction with the performance of the procedure.
