(2) The insurer may pay a present value of the face amount. The calculation shall be based on any applicable actuarial discount appropriate to the policy design. The interest rate or interest rate methodology used in the calculation shall be based on sound actuarial principles and disclosed in the contract or actuarial memorandum. The maximum interest rate used shall be no greater than the greater of:
   (A) The current yield on 90 day treasury bills; or
   (B) The current maximum statutory adjustable policy loan interest rate.
(3) The insurer may accrue an interest charge on the amount of the accelerated benefits. The interest rate or interest rate methodology used in the calculation shall be based on sound actuarial principles and disclosed in the contract or actuarial memorandum. The maximum interest rate used shall be no greater than the greater of:
   (A) The current yield on 90 day treasury bills; or
   (B) The current maximum statutory adjustable policy loan interest rate. The interest rate accrued on the portion of the lien which is equal in amount to the cash value of the contract at the time of the benefit acceleration shall be no more than the policy loan interest rate stated in the contract.
(b) Effect on cash value.
(1) Except as provided in 365:10-5-109(b)(2), when an accelerated benefit is payable, there shall be no more than a pro rata reduction in the cash value based on the percentage of death benefits accelerated to the produce the accelerated benefit payment.

Future access to additional policy loans could also be limited to any excess of the cash value over the sum of the lien and any other outstanding policy loans.
(c) Effect of any outstanding policy loans on accelerated death benefit payment. When payment of an accelerated benefit results in a pro rata reduction in the cash value, the payment may not be applied toward repaying an amount greater than a pro rata portion of any outstanding policy loans.
365:10-5-110. Actuarial disclosure and reserves

(a) **Actuarial memorandum.** A qualified actuary should describe the accelerated benefits, the risks, the expected costs and the calculation of statutory reserves in an actuarial memorandum accompanying each state filing. These descriptions shall be made available for examination by the Commissioner upon request.

(b) **Reserves.**

Mortality tables and interest currently recognized for life insurance reserves by the NAIC may be used as well as appropriate assumptions for the other provisions incorporated in the policy form. The actuary must follow both actuarial standards and certification for good and sufficient reserves. Reserves in the aggregate should be sufficient to cover:

   (B) Policies upon which an accelerated claim has arisen.

(2) For policies and certificates which provide actuarially equivalent benefits, no additional reserves need to be established.
