Continuing Education Course Audit Notice

The Oklahoma Insurance Department is dedicated to providing consumer protections to our citizens and as a part of such we ensure that our insurance professionals are being provided training to understand the laws and information pertaining to selling, soliciting or negotiating insurance products in this state.

Recently, another state has reported severe unethical behaviors regarding one of their licensed insurance continuing education (CE) providers. The provider knowingly and willingly encouraged cheating on CE examinations, falsification of documents regarding the actual time spent in class as well as other unethical behaviors. That state subsequently revoked the responsible CE provider's rights.

The Oklahoma Insurance Department will continue to randomly audit CE courses and providers. In addition, we encourage all licensed insurance professionals who experience any unethical behaviors or requests to immediately notify this office of such. Any report of like behaviors or requests will automatically result in an investigation by this office upon the CE provider. Subsequent to the findings of an investigation, disciplinary actions may be taken by this office upon the provider up to and including the termination of the provider's status with the Oklahoma Insurance Department.

Should you have any questions regarding Oklahoma Continuing Education requirements for insurance professionals or CE providers, please feel free to contact Erin Edwards at (405) 522-0897 or by email, erin.edwards@oid.ok.gov.
