Independent Auditor's Report

The Board of Trustees
Oklahoma Schools Insurance Group

Report on the Financial Statements

We have audited the accompanying financial statements of Oklahoma Schools Insurance Group, which comprise the statements of net position, as of June 30, 2021 and 2020, and the related statements of revenues, expenses, and changes in net position, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Oklahoma Schools Insurance Group as of June 30, 2021 and 2020, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters*Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and loss development information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Oklahoma Schools Insurance Group

Management's Discussion and Analysis

The following Management's Discussion and Analysis (MD&A) of the activities and financial performance of Oklahoma Schools Insurance Group (OSIG) provides an introduction to the financial statements for the years ended June 30, 2021 and 2020.

OSIG, established in July 2001, is an Interlocal Cooperation Act Agency of schools offering membership to public school districts in Oklahoma, with a mission to provide quality, cost effective, risk management products and services to its member school districts.

Activity Highlights

	Years Ended June 30		
	2021	2020	2019
Member schools at beginning of year	452	400	375
Member schools added (lost) during the year, net	16	52	25
Total member schools, end of year	468	452	400
Member contributions	\$ 51,610,260	\$ 43,471,382	\$ 32,872,092
Member distributions	-	-	1,478,521

During the years ended June 30, 2021, 2020, and 2019 net position increased \$133,850, \$1,930,300 and \$23,333, respectively. These changes are a direct result of claim experience, the benefit of excess insurance policies protecting against large claim losses and investment income.

The school superintendents who serve on the OSIG Board of Trustees have played an integral part in the formation and critical decisions of OSIG. All member schools have a voice in OSIG. It is a school-owned program, run by its members and in business solely to serve Oklahoma schools.

OSIG operates under the open meeting act similar to school districts. In addition to the property and casualty insurance program available to OSIG members, OSIG offers risk management resources such as online training programs in the areas of child safety and child sexual abuse prevention and various employment practices liability issues to its member schools. OSIG also performs loss control risk assessments free of charge to its members. Additional services may be added in the future.

Board of Trustees:

- Terry Davidson, Finance Director – Comanche Public Schools
- Rick Thomas, Superintendent – Skiatook Public Schools
- Shelley Free, Superintendent – Kiamichi Technology Center
- Brad Overton, Superintendent – Cordell Schools
- Randy Hughes, Superintendent – McAlester Schools
- John Cox, Superintendent – Peggs Schools
- Sherry Durkee, Superintendent – Sand Springs Public Schools

Executive Director: David Martin

Management's Discussion and Analysis

Overview of the Financial Statements

Included herein are summarized versions of the statements of net position, the statements of revenues, expenses and changes in net position and the statements of cash flows. These statements provide financial information on OSIG as a whole.

These statements include all assets and liabilities using the accrual basis of accounting, which is consistent with the accounting used by private-sector institutions. All of the current year's revenues and expenses are recognized when earned or incurred, regardless of when cash is received or paid. Capital assets are capitalized and depreciated over their useful lives.

This section of the report is designed to provide member school districts, creditors and suppliers with a general overview of OSIG's finances.

The statements of net position: The statements of net position and the statements of revenues, expenses and changes in net position report OSIG's net position and how it has changed over the stated period. Net position, the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources, is one measure of OSIG's financial health or position. OSIG has no deferred outflows or inflows at June 30, 2021, 2020 or 2019. The following summarizes OSIG's assets, liabilities and net position as of June 30, 2021, 2020 and 2019:

	As of June 30		
	2021	2020	2019
Assets:			
Cash, cash equivalents and investments	\$ 15,215,888	\$ 20,821,106	\$ 23,003,506
Net reinsurance receivable	18,758,799	10,651,653	4,787,340
Other	36,108	91,657	82,405
Total assets	<u>\$ 34,010,795</u>	<u>\$ 31,564,416</u>	<u>\$ 27,873,251</u>
Liabilities:			
Net unpaid losses and loss adjustment expenses	\$ 17,997,166	\$ 15,416,602	\$ 12,724,860
Prepaid member contributions	2,039,372	2,286,484	1,768,368
Other	65,438	86,361	1,535,354
Total liabilities	<u>\$ 20,101,976</u>	<u>\$ 17,789,447</u>	<u>\$ 16,028,582</u>
Net position:			
Investment in capital assets	\$ -	\$ -	\$ -
Unrestricted	13,908,819	13,774,969	11,844,669
Total net position	<u>\$ 13,908,819</u>	<u>\$ 13,774,969</u>	<u>\$ 11,844,669</u>

Oklahoma Schools Insurance Group

Management's Discussion and Analysis

Overview of the Financial Statements (Continued)

The statements of revenues, expenses and changes in net position: The following summarizes OSIG's statements of revenues, expenses and changes in net position for the years ended June 30, 2021, 2020 and 2019:

	Years Ended June 30		
	2021	2020	2019
Operating revenues:			
Member contributions	\$ 51,610,260	\$ 43,471,382	\$ 32,872,092
Operating expenses:			
Losses and loss adjustment expenses	16,414,213	12,229,381	9,950,688
Reinsurance premiums	25,321,119	20,940,436	15,352,691
Agent commissions	4,984,961	4,094,279	3,175,125
Management fees	3,612,718	3,359,429	2,629,767
Claims administration fees	719,233	647,117	588,769
Risk management services	166,328	166,397	137,512
Other expenses	472,020	590,477	289,281
Total operating expenses	51,690,592	42,027,516	32,123,833
Operating income (loss)	(80,332)	1,443,866	748,259
Nonoperating revenues:			
Investment income	215,073	456,713	474,913
Net change in fair value of investments	(891)	29,721	278,682
Net nonoperating revenues	214,182	486,434	753,595
Distributions to members	-	-	1,478,521
Change in net position	133,850	1,930,300	23,333
Net position at beginning of year	13,774,969	11,844,669	11,821,336
Net position at end of year	\$ 13,908,819	\$ 13,774,969	\$ 11,844,669

All of OSIG's member contributions are the premiums charged to provide coverage in the OSIG plan.

The statements of cash flows: The primary purpose of the statements of cash flows is to provide information about the cash receipts and disbursements of an entity during a period. These statements also aid in the assessment of an entity's ability to generate future cash flows, ability to meet obligations as they come due and needs for external financing.

Oklahoma Schools Insurance Group

Management's Discussion and Analysis

Overview of the Financial Statements (Continued)

The following summarizes OSIG's cash flows for the years ended June 30, 2021, 2020 and 2019:

	Years Ended June 30		
	2021	2020	2019
Cash provided by (used in):			
Operating activities	\$ (5,819,400)	\$ (2,716,771)	\$ (2,171,529)
Investing activities	4,266,846	3,706,532	3,876,287
Net change in cash and cash equivalents	(1,552,554)	989,761	1,704,758
Cash and cash equivalents at beginning of year	5,953,403	4,963,642	3,258,884
Cash and cash equivalents at end of year	\$ 4,400,849	\$ 5,953,403	\$ 4,963,642

OSIG's overall liquidity decreased during the year ended June 30, 2021, and increased during 2020 and 2019, with a net decrease to cash and cash equivalents of \$1,552,554, and a net increase of \$989,761 and \$1,704,758, respectively. The cash provided by or used in operating activities is primarily related to receipts of member contributions, offset by the payment of claims, insurance premiums and management expenses. Cash provided by or used in investing activities relates to net purchases and sales of investments, plus interest and dividend income received. Cash used in financing activities relates to capital asset purchases.

Member Distributions

When underwriting results are favorable, OSIG makes every effort to distribute equity back to its' member schools. OSIG declared a distribution to the members of \$-0-, \$-0- and \$1,478,521 for the years ended June 30, 2021, 2020 and 2019.

Capital Asset and Debt Administration

OSIG had no significant capital asset activity and no debt administration activity during the years ended June 30, 2021, 2020 or 2019.

Economic Factors and Premium Rates

OSIG's management considered many factors when developing the annual operating budget for the fiscal year ending June 30, 2022.

The budget for the fiscal year ending June 30, 2022, was developed based upon the following key assumptions:

- Member contributions are based upon the losses projected to be incurred for the upcoming year and premium costs from the reinsurance markets. These contributions are expected to increase approximately 27.7% due to approximately 63 new members joining OSIG and an increase in reinsurance premium cost.
- Investment income is projected to be approximately 1.8% of the market value of total investments, consistent with the current low interest rate environment.
- Forecasted claim losses are based upon actuarial estimates.

Contacting the OSIG's Financial Management

This financial report is designed to provide a general overview of OSIG. If you have questions about this report or would like to request additional information, contact the Oklahoma Schools Insurance Group at P.O. Box 3068, Tulsa, Oklahoma 74101.

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 1. Organization and Significant Accounting Policies

Organization: Oklahoma Schools Insurance Group (OSIG) was established by an agreement with an effective date of July 1, 2001, and a duration of fifty years, unless sooner dissolved or extended. OSIG is an Interlocal Cooperation Act Agency of schools offering membership to 468 public school districts (the members) in Oklahoma with a mission to provide quality, cost effective, risk management products and services to its members. OSIG is owned by its members.

OSIG is governed by a seven-member Board of Trustees elected by its members. Trustee responsibilities include reviewing and ensuring compliance with OSIG's policies and services as contemplated in its establishing agreement and bylaws. Title to all assets acquired by OSIG is vested in it. Each participating member pays its share for all costs, premiums or other fees attributable to its respective participation in any plan, policy or service created in the establishing agreement and is responsible for its obligation under any contract entered into with OSIG. In the event of dissolution of OSIG, the funds and other assets not necessary to pay claims or the expenses of OSIG are to be distributed to the members in accordance with the bylaws as determined by the Board of Trustees.

Financial statement presentation: OSIG's financial statements are presented in accordance with the requirements of Governmental Accounting Standards Board (GASB) specific to enterprise fund activities. Under these requirements, OSIG is required to present a statement of net position classified between current and noncurrent assets and liabilities, a statement of revenues, expenses and changes in net position, with separate presentation for operating and nonoperating revenues and expenses and a statement of cash flows, using the direct method.

Basis of accounting: For financial reporting purposes, OSIG is considered a special-purpose government entity engaged only in business-type activities. Accordingly, OSIG's financial statements have been presented using the economic resources measurement focus and the accrual basis of accounting. Under the accrual basis, revenues are recognized when earned and expenses are recorded when an obligation has been incurred.

Cash, cash equivalents and other deposits: OSIG considers investments with original maturities of three months or less to be cash equivalents. OSIG had no cash equivalents at June 30, 2021 or 2020.

Investments: Investments, which include U.S. Treasury bills, are reported at fair value. Certificates of deposit are recorded at cost which approximates fair value. Fair value is the last reported sales price at current exchange rates on a national exchange, as available, or estimated fair value as provided by the investment manager. All investments expected to be liquidated in the next fiscal year to cover claim payments are reported as current. Remaining investments are reported as noncurrent.

Allowance for doubtful accounts: Based on a review of the current status of existing receivables, OSIG's management determined that an allowance for doubtful accounts for reinsurance and accounts receivables at June 30, 2021 and 2020, was not necessary.

Reinsurance: In the ordinary course of business, OSIG has reinsured portions of its liability, property, and other insurance coverage to limit the amounts of potential losses on individual claims, although it does not discharge the primary responsibility of OSIG as direct insurance of the risks reinsured. Reinsurance is ceded on an excess of loss basis. OSIG does not report reinsured risks as liabilities unless it is probable that those risks will not be covered by reinsurers. Amounts recoverable from reinsurers are estimated in a manner consistent with the unpaid losses and loss adjustment expenses associated with the reinsurance policy.

Unpaid losses and loss adjustment expenses: The provision for unpaid losses and loss adjustment expenses includes the estimated costs of investigating and settling all claims incurred as of the date of the statements of net position.

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 1. Organization and Significant Accounting Policies (Continued)

Such amounts include estimates for case reserves and incurred but not reported (IBNR) claims and are determined on the basis of claims adjusters' evaluations and independent actuarial estimates. Unpaid losses and loss adjustment expenses are reported net of amounts that are expected to be recovered from reinsurers. Unpaid losses and loss adjustment expenses are not discounted for expected investment rates of return.

Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Income taxes: OSIG is a public entity organized under the laws of the state of Oklahoma and, as such, is considered to be an instrumentality of a political subdivision exempt from federal income taxes under Internal Revenue Code section 115.

Revenue recognition: Insurance contracts with members are for a one-year period beginning July 1 through June 30. Member contributions are determined on a member-by-member basis and are due at the beginning of each contract period and are recognized as revenue over the period of the contract. OSIG's program administrator calculates each member's contribution using premium rates provided by OSIG's reinsurer's loss rates within the retention as estimated by the actuary, and factors to include underwriting considerations, administrative expenses, claims adjustment expenses and agent commissions. Prepaid member contributions are amounts received for which coverage has not yet been provided.

Premium deficiency: A premium deficiency exists when the sum of expected claims costs (including an estimated liability for unreported claims) and all expected claims adjustment expenses, and coverage agreement acquisition costs exceed related unearned premiums. OSIG anticipates investment income in determining if a premium deficiency exists. At June 30, 2021 and 2020, OSIG determined no premium deficiency existed.

Classification of revenues: OSIG has classified its revenues as either operating or nonoperating revenues. Operating revenues include transactions that constitute OSIG's principal ongoing operations, such as providing coverage. Nonoperating revenues consist of other revenue sources not directly affiliated with operations, such as investment income.

Custodial credit risk—deposits: Custodial credit risk is the risk that in the event of bank failure, OSIG's cash deposits may be lost. OSIG does not have a deposit policy for custodial credit risk. As of June 30, 2021 and 2020, OSIG had fully insured cash on deposits with financial institutions of approximately \$500,000. As of June 30, 2021, approximately \$4,790,000 of OSIG's bank balance of approximately \$5,290,000 (carrying amount of approximately \$4,401,000) was uninsured and uncollateralized and therefore exposed to custodial credit risk. As of June 30, 2020, approximately \$6,405,000 of OSIG's bank balance of approximately \$6,905,000 (carrying amount of approximately \$5,953,000) was uninsured and uncollateralized and therefore exposed to custodial credit risk.

Credit risk—insurance carriers: As discussed in Note 5, OSIG utilizes reinsurance contracts to minimize its exposure on certain types of claims. Failure of the insurance carrier to honor its obligation under the insurance agreements could result in losses to OSIG. OSIG's management evaluates the financial condition of its insurance carriers to minimize its exposure to significant losses and believes the carriers presently used are financially sound and will be able to meet their contractual obligations. OSIG, through Arthur J. Gallagher, only places coverage with companies rated A-VII or better by A.M. Best, an industry-standard rating company.

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 2. Investments

Custodial credit risk—investments: For an investment, custodial credit risk is the risk that OSIG will not be able to recover the value of its investments that are in the possession of its safekeeping custodians. All of OSIG's investments are held by its agent in OSIG's name. Accordingly, no investments are subject to custodial credit risk. At June 30, 2021 and 2020, OSIG held certificates of deposit with an original maturity exceeding three months, totaling \$6,815,067 and \$11,868,353, respectively. The certificates of deposits are fully insured by the Federal Deposit Insurance Corporation (FDIC).

Fair value hierarchy: OSIG categorizes its fair value measurements within the fair value hierarchy established by GASB 72. The hierarchy is based on the valuation inputs used to measure the fair value of the assets. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs, including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets in markets that are not active, and other market corroborated inputs; Level 3 inputs are significant unobservable inputs. The categorization of investments within the hierarchy is based upon the pricing transparency of the instrument and should not be perceived as the particular investment's risk.

OSIG has the following Level 2 fair value of investments and their maturities as of June 30, 2021 are as follows:

Investment Type	Investment Maturities (In Years)				
	Fair Value	Less Than 1	1–5	6–10	More Than 10
Certificates of deposit	\$ 6,815,067	\$ 5,405,323	\$ 1,409,744	\$ -	\$ -
U.S. Treasury bills	3,999,972	3,999,972	-	-	-
Total	<u>\$ 10,815,039</u>	<u>\$ 9,405,295</u>	<u>\$ 1,409,744</u>	<u>\$ -</u>	<u>\$ -</u>

OSIG has the following Level 2 fair value of investments and their maturities as of June 30, 2020 are as follows:

Investment Type	Investment Maturities (In Years)				
	Fair Value	Less Than 1	1–5	6–10	More Than 10
Certificates of deposit	\$ 11,868,353	\$ 5,239,932	\$ 6,628,421	\$ -	\$ -
U.S. Treasury bills	2,999,350	2,999,350	-	-	-
Total	<u>\$ 14,867,703</u>	<u>\$ 8,239,282</u>	<u>\$ 6,628,421</u>	<u>\$ -</u>	<u>\$ -</u>

All investments expected to be liquidated in the next fiscal year to cover claim payments are reported as current in the accompanying statements of net position. Remaining investments are reported as noncurrent.

Interest rate risk: OSIG does not have a formal policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The majority of OSIG's investments are in certificates of deposit, which are subject to risks associated with rising interest rates.

Concentration of credit risk: OSIG does not have a formal policy that limits the amount of an investment into a single issuer. Exposure to concentration of credit risk is considered to exist when investments in any one issuer represent a significant percent of total investments of OSIG (any over 5% are disclosed). Investments issued or explicitly guaranteed by the U.S. government and investments in mutual funds, external investment pools and other pooled investments are excluded from this consideration.

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 3. Administrative and Other Costs

For the years ended June 30, 2021 and 2020, the Board of Trustees contracted with Arthur J. Gallagher Risk Management Services (Gallagher) to serve as the program administrator. Under the terms of the contract with Gallagher, OSIG agreed to pay Gallagher a fee equal to 7% of member contributions for the years ended June 30, 2021 and 2020. Fees paid to Gallagher for the years ended June 30, 2021 and 2020, totaled approximately \$3,613,000 and \$3,359,000, respectively. In addition to their duties as administrator, Gallagher pays for loss control inspections, property appraisals and other risk management resources.

For the years ended June 30, 2021 and 2020, the Board of Trustees contracted with Alternative Service Concepts LLC (ASC) to be the third-party administrator responsible for claims processing. Fees paid to ASC for the years ended June 30, 2021 and 2020, totaled approximately \$719,000 and \$647,000, respectively. OSIG also pays a 10% commission independent insurance agents, which totaled approximately \$4,985,000 and \$4,094,000 for the years ended June 30, 2021 and 2020, respectively. Additionally, OSIG contracted with David Martin to serve as OSIG's executive director. Payments to David Martin for services rendered under the contract was approximately \$97,000 and \$95,000 during the years ended June 30, 2021 and 2020, respectively.

Note 4. Unpaid Losses and Loss Adjustment Expenses

The coverage offered by OSIG is on an occurrence basis except educators' legal liability, which is offered to members on a claims-made basis. The liability for unpaid losses and loss adjustment expenses is estimated, based upon an evaluation of reported claims and an estimate for IBNR claims. The IBNR reserve estimates expenses related to incidents which have already occurred, but have not yet been reported as a claim, and expected future development of claims already reported. The estimate is based on a study performed by an independent actuarial service with actual claims data as of June 30, 2021 and 2020.

The accuracy of these estimates cannot be determined prior to the ultimate settlement of each claim. Accordingly, the ultimate cost of settling these claims may vary significantly from the liabilities recorded at year-end and may do so in the near term.

There is a substantial liability for any additional reported claims that could be incurred by OSIG up to the maximum liability as defined under its excess reinsurance contracts.

At June 30, 2021 and 2020, the liability for unpaid losses and loss adjustment expenses excludes approximately \$88,490,000 and \$75,445,000, respectively, for unpaid claims expected to be recoverable from excess carriers.

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 4. Unpaid Losses and Loss Adjustment Expenses (Continued)

The following represents changes in the liability of unpaid losses and loss adjustment expenses for OSIG:

	Year Ended June 30, 2021		
	Case Reserves	IBNR	Total
Net unpaid losses and loss adjustment expenses at beginning of year	\$ 11,752,602	\$ 3,664,000	\$ 15,416,602
Incurred losses and loss adjustment expenses:			
Provision for insured events of the current year	13,071,457	2,549,000	15,620,457
Change in provision for insured events of prior years	2,487,756	(1,694,000)	793,756
Net incurred losses and loss adjustment expenses	15,559,213	855,000	16,414,213
Payments:			
Losses and loss adjustment expenses attributable to insured events of the current year	5,244,608	-	5,244,608
Losses and loss adjustment expenses attributable to insured events of prior years	8,589,041	-	8,589,041
Net payments	13,833,649	-	13,833,649
Unpaid losses and loss adjustment expenses at end of year, net of reinsurance receivable	\$ 13,478,166	\$ 4,519,000	\$ 17,997,166

The provision for unpaid losses and loss adjustment expenses increased by approximately \$794,000 in 2021 due to unfavorable development on case-basis reserves of \$2,488,000 partially offset by expiration of IBNR risk on older policy years of \$1,694,000. The liability for unpaid losses and loss adjustment expenses at June 30, 2021 included approximately \$4,519,000 for IBNR claims.

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 4. Unpaid Losses and Loss Adjustment Expenses (Continued)

	Year Ended June 30, 2020		
	Case Reserves	IBNR	Total
Net unpaid losses and loss adjustment expenses at beginning of year	\$ 10,546,860	\$ 2,178,000	\$ 12,724,860
Incurred losses and loss adjustment expenses:			
Provision for insured events of the current year	10,818,526	2,038,000	12,856,526
Change in provision for insured events of prior years	(75,145)	(552,000)	(627,145)
Net incurred losses and loss adjustment expenses	10,743,381	1,486,000	12,229,381
Payments:			
Losses and loss adjustment expenses attributable to insured events of the current year	6,191,652	-	6,191,652
Losses and loss adjustment expenses attributable to insured events of prior years	3,345,987	-	3,345,987
Net payments	9,537,639	-	9,537,639
Unpaid losses and loss adjustment expenses at end of year, net of reinsurance receivable	\$ 11,752,602	\$ 3,664,000	\$ 15,416,602

The provision for unpaid losses and loss adjustment expenses decreased by approximately \$627,000 in 2020 due to favorable development on case-basis reserves of \$75,000 offset by expiration of IBNR risk on older policy years of \$552,000. The liability for unpaid losses and loss adjustment expenses at June 30, 2020 included approximately \$3,664,000 for IBNR claims.

Note 5. Reinsurance Coverage/Structure

OSIG provides its members with property damage, automobile damage, general liability, auto liability, educators legal liability, boiler and machinery, school violent act protection, crime, and cyber liability coverages. Claims have historically been paid with funding from the annual member contributions, with claims in excess of specified thresholds covered by reinsurance coverage.

Thresholds for the years ended June 30, 2021 and 2020, were as follows:

	Per Occurrence	Aggregate
2021:		
Property and automobile damage	\$ 250,000 *	N/A
Property and automobile damage—windstorm/hail/CAT	750,000 *	N/A
General, automobile and professional liability	100,000	5,981,589

Oklahoma Schools Insurance Group

Notes to Financial Statements

Note 5. Reinsurance Coverage/Structure (Continued)

	<u>Per Occurrence</u>	<u>Aggregate</u>
2020:		
Property and automobile damage	\$ 250,000 *	N/A
Property and automobile damage—windstorm/hail	500,000 *	N/A
General, automobile and professional liability	100,000	5,537,139

* Property insurance per occurrence reimbursements from reinsurers are subject to a corridor deductible of \$3,000,000. Each property claim that is not related to windstorm or hail damage in excess of \$250,000 first must satisfy the \$250,000 per occurrence threshold, with amounts over \$250,000 applied toward the corridor deductible. Each property claim related to windstorm, hail damage or CAT claims in excess of \$750,000 first must satisfy the \$750,000 per occurrence threshold, with amounts over \$750,000 applied toward the corridor deductible. No amounts are due under the agreement until the \$3,000,000 corridor deductible is satisfied.

In some instances, multiple members can be affected by the same loss event. These reinsurance thresholds are applied to the aggregate loss for these single events. The reinsurance contracts do not relieve OSIG from its obligation to its members.

Reinsurance was not utilized for either the boiler and machinery or crime coverage. Boiler and machinery coverage is 100% reinsured. The boiler and machinery reinsurance contract has a required deductible per claim of \$1,000, which is passed through to the member filing the claim. Crime coverage is self-insured by OSIG, with a maximum limit on each claim of \$10,000 and deductibles per claim of \$1,000.

During the years ended June 30, 2021 and 2020, there was a gross increase in recoverable claims cost, prior to netting cash received from reinsurers, of approximately \$71,955,000 and \$76,923,000, respectively.

Note 6. Commitments and Contingencies

Legal matters: In conducting its activities, OSIG, from time to time, is the subject of various claims arising from the ordinary course of business. OSIG reserves the underlying losses at best estimates as events transpire. In the opinion of management, the ultimate resolution of such claims is not expected to have a material adverse effect upon the financial statements of OSIG.

COVID-19 Implications: A pandemic, epidemic or outbreak of an infectious disease could adversely impact OSIG. Due to the evolving and highly uncertain nature of COVID-19, it currently is not possible to provide an estimate of any potential financial exposure or the indirect effect the outbreak may have on OSIG's results of operations, financial condition or liquidity. OSIG will continue to monitor the effects of COVID-19.

Oklahoma Schools Insurance Group

10-Year Loss Development

The following table illustrates how OSIG's earned member contributions and investment income (net of amounts ceded to reinsurance carriers) compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by OSIG as of the end of each of the last ten years. The rows of the table are defined as follows:

- (1) Total earned member contributions and investment revenues, net of costs for reinsurance.
- (2) Other administrative costs of OSIG, including overhead and claims expense not allocable to individual claims.
- (3) Incurred claims and allocated claim adjustment expenses (both paid and reserved, net of losses covered by reinsurance) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (policy year).
- (4) Cumulative amounts paid as of the end of successive years for each policy year.
- (5) Latest reestimated amount of losses assumed by reinsurers for each policy year.
- (6) Increase or decrease in estimates of net incurred claims and allocated claim adjustment expenses for each policy year as of the end of successive years. This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously reported.
- (7) Compares the latest reestimated incurred claims amount (line 6) and the estimate originally established (line 3). Shows whether the latest estimate of claims cost is greater or less than originally estimated. As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of initial loss estimation methods.

Section 1

Executive Summary

The purpose of this report is to provide the Oklahoma Schools Insurance Group (OSIG) with an evaluation of the projected liabilities associated with its property and liability insurance programs. The specific objectives are (a) to forecast ultimate losses for the 7/1/21-22 period; and (b) to analyze the variability inherent in the forecast losses by deriving estimates at various percentiles or confidence levels. Throughout this report the term losses refers to both losses and allocated loss adjustment expenses.

The liability program will continue with a \$100,000 per occurrence retention. The results are summarized below.

Liability Program Forecast for 7/1/21-22 with \$100,000 Retention	
Total Expected Losses	\$3,910,000
75 th Percentile Losses	\$4,333,000
Exposure (students)	485,913
Expected Rate	\$8.05

The property program will change from a SIR plus corridor structure to a \$25,000 maintenance deductible with a large aggregate deductible, followed by a \$100,000 trailing deductible per occurrence, once the aggregate is reached. A separate forecast for members who purchase only automobile physical damage is shown along with the property program losses at two different aggregate limits. Also, auto physical damage claims due to over the road injuries do not erode the aggregate.

Property Program Forecast for 7/1/21-22			
	<i>Primary Auto Physical Damage</i>	<i>Property with APD \$20M Aggregate</i>	<i>Property with APD \$25M Aggregate</i>
Total Expected Losses	\$124,000	\$22,941,000	\$26,852,000
<i>75th Percentile Losses</i>	<i>\$138,000</i>	<i>\$23,988,000</i>	<i>\$28,637,000</i>
<i>Exposure</i>	<i>1,369 vehicles</i>	<i>\$16.5 Billion</i>	<i>\$16.5 Billion</i>
<i>Expected Loss Rate</i>	<i>\$90.26</i>	<i>\$0.139 per \$100</i>	<i>\$0.161 per \$100</i>
<i>Retentions</i>	<i>\$100,000 Per Occurrence</i>	<i>\$25,000 Maintenance Deductible/\$100,000 Trailing Deductible</i>	<i>\$25,000 Maintenance Deductible/\$100,000 Trailing Deductible</i>

Tables at the end of this Executive Summary display the results of our analysis in greater detail. Table A summarizes the forecast losses, loss rate per exposure, total expected claims and expected large claims. Table B shows the aggregate distribution of the forecast losses.

Discussion of Results

Automobile Liability

We project that OSIG will incur accident year 7/1/21-22 automobile liability losses of \$1,485,000, at a cost of \$114 per vehicle. This rate is about 8.0% less than the rate estimated in the previous actuarial report. We estimate a total of 223.9 claims with 2.7 of these claims expected to exceed \$100,000 (Exhibit 5). The total provision for large claims at the \$100,000 retention is \$267,000, which makes up about 18% of the total forecast. There is a 50% chance that losses will be less than \$1,451,000, and a 10% chance that losses will exceed \$1,944,000 (Exhibit 6).

General Liability

We project that OSIG will incur accident year 7/1/21-22 general liability losses of \$2,425,000, at a cost of \$4.99 per student. This rate is about the same as the rate estimated in the previous actuarial report. We estimate a total of 116.5 claims with 8.1 of these claims expected to exceed \$100,000 (Exhibit 5). The total provision for large claims at the \$100,000 retention is \$810,000, which makes up 33% of the total forecast. There is a 50% chance that losses will be less than \$2,360,000, and a 10% chance that losses will exceed \$3,237,000 (Exhibit 6).

Auto Physical Damage

For members that only purchase the primary APD policy, we estimate the losses within OSIG's \$100,000 retention to be \$124,000 which is a rate of \$90.26 per vehicle. We expect about 15.8 claims with an average size of \$7,800. There is a 50% probability that losses will be less than \$122,000 and a 10% probability that they could exceed \$155,000.

Most members participate in the property program which includes auto physical damage within the same limits. We have estimated that the losses included in the property forecast that are attributed to APD causes is about \$1,097,000 which is a rate of \$97.58 per vehicle.

Property

The structure of the proposed property program is different from the previous program. OSIG retains the first \$25,000 for all claims, with amounts in excess of \$25,000 applied to the aggregate. The exception is that auto physical damage claims due to over the road injuries will not erode the aggregate. The large aggregate deductible applies to all other claims regardless of size or cause of loss. Once the aggregate is reached, OSIG will have a \$100,000 trailing deductible for all claims, with the carrier picking up the losses excess of \$100,000.

We expect OSIG to incur about 327.4 claims with an average severity of \$124,000. Total expected losses before application of the insurance provisions are \$40,333,000. For any given claim, there is a 90.5%

probability that the claim will be less than \$100,000, and would be retained by OSIG, either through the aggregate retention or the trailing deductible. There is a 1.0% probability that a claim would exceed \$2,000,000, the 99th percentile and 0.1% probability that a claim could exceed \$13,800,000, the 99.9th percentile.

After applying the \$25,000 maintenance deductible, the \$20,000,000 aggregate deductible and the trailing deductible of \$100,000 we subtract the member deductibles of \$1,602,000 to get total program expected losses of \$22,941,000. There is a 25% probability that claims will be less than \$23,988,000 and a 10% probability that they could exceed \$24,559,000.

Raising the aggregate retention to \$25,000,000 also raises the expected program losses to \$26,582,000. The 75th percentile estimate is \$28,637,000, and the 90th percentile is \$29,287,000.

Section 2

Considerations

Background

Oklahoma Schools Insurance Group was formed in 2002 to insure the liability and property exposures for member school districts in the state of Oklahoma. The group purchases excess insurance for above a retention layer that varies by line of coverage. Arthur J. Gallagher Risk Management Services, Inc. manages OSIG. Select Actuarial Services has provided actuarial consulting services for OSIG, including loss forecasting and reserving studies since 2002.

Scope

Select Actuarial Services has prepared this report for OSIG at the request of Jennifer McKenzie of Arthur J. Gallagher Risk Management Services, Program Manager for OSIG. The specific objectives are (a) to forecast the ultimate losses for 7/1/21-22 for property and liability; and (b) to analyze the variability inherent in the losses by deriving estimates at various percentiles or confidence levels.

This report is an actuarial analysis of data, conditions, and practices communicated as of January 26, 2021, to Select Actuarial Services as described in this report. While Select Actuarial Services believes these communications to be reliable, it has not attempted to audit the information and cannot guarantee the accuracy of any information supplied. However, the data have been reviewed for reasonableness and internal consistency, comparing the claims experience from year to year, and comparing to prior evaluations.

We have not anticipated any extraordinary changes to the social, legal and economic environment that may affect the frequency, cost or future reporting and settlement patterns of claims. In addition, our estimates do not include any provision for future claims arising out of causes not represented in the current data.

Use and Distribution

The actuarial estimates in this report are based upon appropriate actuarial assumptions and procedures described in the section of this report entitled "Description of Exhibits." Select Actuarial Services assumes no responsibility for any loss or damage that might arise from the use of or reliance upon this report other than for the purposes set forth herein.

This report was prepared for the use of and is only to be relied upon by the management of the Oklahoma Schools Insurance Group. This report may also be provided to OSIG's auditors and insurance brokers. No portion of the report may be provided to any other party without Select Actuarial Services' prior consent. In the event that such consent is provided, the report must be provided in its entirety.

We recommend that any such party have its own actuary review this report to ensure that the party understands the assumptions and uncertainties inherent in our estimates.

Qualifications and Standards of Practice

Laura Sprouse is a Fellow of the Casualty Actuarial Society and a Member of the American Academy of Actuaries. She meets the Qualification Standards of the American Academy of Actuaries to render actuarial opinions for property/casualty reserves. This report is prepared in accordance with Actuarial Standards of Practice No. 23, *Data Quality*, No. 41, *Actuarial Communications*, and No. 53, *Estimating Future Costs for Prospective Property/Casualty Risk Transfer and Risk Retention*.

Coverage

OSIG began writing automobile liability, general liability, errors & omissions, auto physical damage and property coverage for member school districts in the state of Oklahoma in 2002. The Group purchases excess insurance above a retention layer which varies by coverage. This retention sits above the member deductibles, which vary by member and by year.

For the 7/1/21-22 year we are estimating the ultimate losses within a \$100,000 retention for automobile and general liability (including E&O). For Property claims we are estimating losses within an aggregate deductible of \$20,000,000 or \$25,000,000 excess of the member maintenance deductible of \$25,000, with a trailing deductible of \$100,000. In addition, OSIG will retain 100% of auto physical damage claims due to over the road accidents. OSIG's will have the benefit of all member deductibles. A few members purchase only auto physical damage coverage with primary limits of \$100,000.

Available Data

Loss information was provided by Jennifer McKenzie, Program Manager for OSIG. This loss information included detail loss runs as of December 31, 2020 and at prior annual evaluations. Exposure data for each member was provided and included vehicle counts, student population and total insured value.

Development is the process in which losses and claim counts for a given accident period change over time. Development is caused by late reporting of claims, case reserve changes, claims reopening, and actual payment and settlement of claims.

Ideally, a client's own patterns should be utilized whenever possible to reflect the client's unique claims administration, reporting procedures, and so forth. Since several historical valuations of the data were available, we have selected patterns based on OSIG's development, supplemented with a benchmark for Oklahoma public entities. A curve-fitting technique is used to smooth and extrapolate the observed development patterns.

Trends and External Influences

Trends are defined as changes over time in underlying costs. Trend factors are used to adjust losses and exposure costs from past years to the level at which they would have been had they occurred during a

future period. This is vital since historical losses and exposure costs may have occurred in a different environment in terms of monetary inflation and/or benefit levels. Trends in average loss costs cannot be clearly discerned from available OSIG data. This analysis explicitly recognizes the effect of external influences upon expected claims costs. Economic inflation is measured by changes in the U.S. Claims Cost Indices as compiled by Willis Towers Watson. We have used the changes in the Consumer Price Index to measure inflation in property values.

Actuarial Central Estimate

The estimates of ultimate losses at the “expected” level in this analysis are actuarial central estimates - estimates that represent an expected value over the range of reasonably possible outcomes. Such a range of reasonably possible outcomes may not include all conceivable outcomes. For example, it would not include conceivable extreme events where the contribution of such events to an expected value estimate is not reliably measurable.

Loss Models

Statistical distributions are often used by the insurance industry to model the loss generating process. This technique allows for the projection of ultimate losses at the expected level and at various confidence levels or percentiles. The variation estimated in this modeling technique is the variation inherent in the historical experience; it does not include potential variation due to unanticipated changes in the environment or to misestimation of parameters.

In forecasting loss experience for 7/1/21-22 we have employed various curves and distributions to model the loss generating process. For the liability program we modeled small losses separately from large losses. Aggregate small losses for the forecast period are modeled by the lognormal probability distribution. Large claim frequencies are modeled by a Poisson distribution. The inverse Weibull distribution was used to model large claim severities. For the property program we modeled the losses using a total claim frequency and severity. A Poisson distribution was selected for frequency. Severity was modeled using a combination of a lognormal distribution and an inverse gamma distribution. We then used a Monte Carlo simulation to generate 10,000 sample years (250,000 sample years for property). The percentile estimates are derived from these outcomes. For example, 7,500 of the outcomes are below the 75th percentile, while 1,000 of the outcomes are above the 90th percentile.

Subrogation and Recoveries

We have used data net of recoveries other than excess throughout this analysis. The effect of such recoveries is therefore implicit in our calculations and no other reductions for collateral sources other than excess insurance have been incorporated into the estimates.

Definitions

Accident Period: All of the events with occurrence dates during a period specified make up the corresponding accident period. The dollars associated with those events total the accident period's

losses, although they may be paid long after the end of the accident period. Losses are grouped by accident period throughout our analyses.

Ultimate Losses: The total amount that will eventually be paid on all losses for a particular accident period. Our estimate of the ultimate losses for an accident period is the sum of the paid losses, the case reserves, and the IBNR reserve.

Paid Losses: Dollars paid as of the latest available evaluation on losses incurred through the latest available evaluation.

Case Reserves: Reserves established on individual claims by the claims adjusters, as of the latest available evaluation. The case reserve plus the amount paid to date represents the adjuster's best estimate of the ultimate value of a particular claim.

Reported Losses: Paid losses plus case reserves as of the latest available evaluation.

Loss Development: The change in the paid losses or the reported losses over time. As more information is provided, individual claim estimates get closer and closer to the ultimate value of the claims. The increase in the total reported losses through time is the reported loss development. Similarly, as losses are paid out over time, the increase in total paid losses is the paid loss development.

Section 3

Description of Exhibits

Exhibit 1: Summary of Data

Exhibit 1-A summarizes the number of reported claims, open claims, paid and reported losses, and exposures for each accident period evaluated as of December 31, 2020. In this Exhibit, all losses are shown gross of per occurrence retentions and net of member deductibles. The exposure data is also shown. The losses and exposures used in this forecast study are those of the current membership.

Exhibit 1-B contains a listing of large claims that are expected to exceed the forecast retentions in effect during the forecast period. These retentions vary by coverage, and by peril for property claims. The reported losses are multiplied by development and trend factors to determine which claims would exceed the retention. These trended and developed claim values are used to estimate the potential large claim experience for the forecast year.

Exhibit 2: Severity Distribution

This exhibit shows the severity distribution fit to claims over \$100,000 for the liability lines and total claims for property. The claims are developed to ultimate and trended to the 7/1/21-22 level. An inverse Weibull curve was fitted to the liability claims. For property, a lognormal distribution provided a best fit for claims below \$75,000, and an inverse gamma distribution was fitted to claims greater than \$75,000. The two distributions were combined to form a single distribution. The curves assigns probabilities to various claim sizes and allows us to model the variation in the large claim experience. The percentiles of the empirical data (the trended developed claims in Exhibit 1-B) are compared to the percentiles derived from the curve.

Exhibit 3: Forecast Claim Counts

Exhibit 3-A calculates the claim frequency for historical years and projects the number of claims for the 7/1/21-22 year. First the reported claims are developed to ultimate using the development factors from Appendix A. Next these ultimate claims are related to the underlying exposures, adjusted for inflation to the 7/1/21-22 level. A frequency rate is selected based on the experience of the more recent years and is multiplied by the forecast exposure to derive an estimate of the total number of claims.

For the liability lines, Exhibit 3-B estimates the ultimate number of large claims for 7/1/21-22 based on the claims in Exhibit 1-B that develop and trend over \$100,000.

Exhibits 4 and 5: Liability

Exhibit 4 calculates the forecast small losses for the 7/1/21-22 period. In Exhibit 4-A, losses for historical accident periods below the large loss threshold are developed to ultimate and trended to the cost level of the forecast period using the trend factors from Appendix B. Losses that would exceed the forecast retention on an ultimate trended basis are removed from the reported and paid loss data. The remaining small losses are developed to ultimate using the loss development factors in Appendix A.

In Exhibit 4-B the ultimate small losses from Exhibit 4-A are compared to the underlying exposure, also trended to the forecast period. In this way, we can compare the experience of each year as if it had happened in 7/1/21-22. We also relate the ultimate small losses to the ultimate small claim counts to derive the small claim severity. The forecast small losses are determined by either selecting a loss rate to apply to the forecast exposure, or selecting the small claim severity to multiply by the forecast number of small claims.

In Exhibit 5, the small and large loss forecasts are combined to estimate the total ultimate losses for the forecast period. Large losses are capped to produce estimates of ultimate losses limited to \$100,000, \$1,000,000, as well as on an unlimited basis.

Exhibits 4 and 5: Auto Physical Damage

Ultimate losses for auto physical damage are forecasted on an aggregate pure premium basis for losses limited to \$100,000 and unlimited. In Exhibit 4-A, claims that develop and trend over \$100,000 are subtracted from the reported losses and a provision for each claim limited to \$100,000 is added back to the developed and trended small losses. The limited ultimate losses are related to the underlying exposures to derive loss rates or pure premiums for each year. A rate is selected for the forecast year and multiplied by the exposures for those members in the primary APD program.

In Exhibit 4-B reported losses are developed to ultimate and trended to 7/1/21-22, then divided by the exposure to derive unlimited pure premiums. A rate is selected for the forecast period and applied to the exposures for the members participating in OSIG's property/APD program.

Exhibit 5 summarizes the results of the forecast.

Exhibits 4 and 5: Property with APD

In Exhibit 4, the reported total losses, including member deductibles, are developed to ultimate and trended to the 7/1/21-22 level. The exposures, which are total insured values (TIV) are also adjusted for inflation using the Consumer Price Index. The ratio of the trended unlimited ultimate losses to the trended exposures is calculated a loss rate or pure premium. A rate is selected for the forecast period and multiplied by the forecast TIV to derive an estimate of the total unlimited losses.

An estimate of the member deductibles for 7/1/21-22 is derived in Exhibit 5 in a method analogous to Exhibit 4.

Exhibit 6: Aggregate Loss Distribution with Percentiles

Exhibit 6 presents the results of the Monte Carlo simulation. Small and large losses for liability are modeled and the applicable deductibles are applied to estimate the expected losses and a range of percentiles.

APD losses are modeled in the aggregate using a single lognormal distribution.

An empirical distribution of annual auto physical damage losses above \$25,000 that were associated with over the road accidents was selected based on a review of the average annual losses for such claims over the last ten years.

Property losses are modeled by randomly generating the total number of claims expected, then randomly assigning a claim amount for each claim from the distribution in Exhibit 2. The insurance program is applied and member deductibles, also randomly generated based on claim size, are subtracted.

Expected losses are average values that one might expect to see if the 7/1/21-22 year were repeated multiple times. Actual losses will inevitably vary from expected losses. The results at various percentiles give an estimate of the amount of potential variation. For example, we estimate that there is a 75% probability that losses will be less than the 75th percentile, and a 90% probability that they won't exceed the 90th percentile.

Appendix A: Loss and Claim Development Factors

Selected loss development factors are fit to an inverse power curve in Appendices A1 through A3, in order to extrapolate factors at the maturities needed. The selected factors are based on analysis in OSIG's reserves study.

Appendix B: Trend Factors

Trend factors are calculated to adjust losses for inflation based on an index of countrywide claims costs.

Trend factors for insured values for property are based on the Consumer Price Index. Vehicle counts and student population are not inflation sensitive and are not adjusted.

Section 1

Executive Summary

The purpose of this report is to provide the Oklahoma Schools Insurance Group (OSIG) with an evaluation of the projected liabilities associated with the retained losses and allocated loss adjustment expenses for its property and liability programs. The specific objectives are (a) to estimate the liability for unpaid losses and allocated loss adjustment expenses as of December 31, 2020 and projected to June 30, 2021; and (b) to analyze the variability inherent in the outstanding losses and IBNR reserves by deriving estimates at various percentiles or confidence levels. Throughout this report the term losses refers to both losses and allocated loss adjustment expenses.

The table below shows the outstanding losses projected as of June 30, 2021, broken down between case reserves and IBNR reserves. Losses shown are undiscounted.

<i>Estimated Unpaid Liabilities as of June 30, 2021</i>			
	<i>Case Reserves</i>	<i>IBNR Reserves</i>	<i>Total Reserve</i>
<i>Liability</i>	\$6,085,000	\$1,984,000	\$8,069,000
<i>Property</i>	\$4,506,803	\$2,864,000	\$7,371,000
<i>Total</i>	\$10,591,803	\$4,848,000	\$15,440,000

Tables at the end of this Executive Summary display the results of our analysis in greater detail. Table A summarizes the ultimate and outstanding losses and IBNR by policy year. Table B shows the IBNR estimates at various percentiles. Table C shows the change in experience since the previous actuarial report. Tables 1 and 2 for each coverage show the projected reserves as of June 30, 2021 and the change in experience since the previous actuarial report.

Discussion of Results

Automobile Liability

Outstanding losses as of December 31, 2020, are \$2,115,000 undiscounted. This includes \$1,676,000 in case reserves and \$439,000 in IBNR reserves. The estimated required reserves as of June 30, 2021 are expected to be \$1,854,000 with \$432,000 of this due to IBNR (Exhibits 5-A&B).

Compared to the projections in the previous actuarial study as of June 30, 2020, reported losses have developed about \$497,000 less than expected in total. The 20-21 year losses are significantly below

expected levels as the pandemic continues to affect in person instruction and bus ridership and routes. We have reduced the ultimate losses from the forecast estimate of \$1,583,000 to \$1,117,000. There were also some smaller reductions on years 14-15 through 19-20. In total, the selected ultimate losses for years through 20-21 have been decreased by \$631,000 (Exhibit 4-A).

General Liability

Outstanding losses as of December 31, 2020, are \$6,540,000 undiscounted. This includes \$5,095,000 in case reserves and \$1,445,000 in IBNR reserves. The estimated required reserves as of June 30, 2021 are expected to be \$6,245,000 with \$1,552,000 of this due to IBNR (Exhibits 5-A&B).

Compared to the projections in the previous actuarial study as of June 30, 2020, reported losses have developed about \$202,000 more than expected in total. The 20-21 year losses are above expected levels with four claims already reported over \$75,000, and slightly higher claim frequency than the prior year. We have increased the ultimate losses from the forecast estimate of \$2,434,000 to \$2,536,000. There were also increases to the 18-19 and 19-20 years and decreases to years 11-12 through 17-18. In total, the selected ultimate losses for years through 20-21 have been increased by \$247,000 (Exhibit 4-A).

Property including Auto Physical Damage

Outstanding losses as of December 31, 2020, are \$8,544,000 undiscounted. This includes \$4,834,000 in case reserves and \$3,721,000 in IBNR reserves. The IBNR includes \$834,000 for the corridor layer as OSIG has \$2,166,000 of reported losses in the corridor so far. The estimated required reserves as of June 30, 2021 are expected to be \$7,371,000 with \$2,864,000 of this due to IBNR (Exhibit 5-A&B). We would expect that the corridor will be reached by June 30.

Compared to the projections in the previous actuarial study as of June 30, 2020, total losses increased significantly due to the costs of storms in the spring of 2020. The effects on OSIG's retained losses was minor in comparison. We increased the ultimate losses for the 19-20 year by \$372,000, which was offset by reductions on prior years. In total, the ultimate losses for years through 20-21 were increased by \$156,000.

COVID-19

As school systems suspended in person learning at the start of the pandemic and moved to various forms of hybrid learning for the current year, the biggest impact to OSIG has been the reduction in claim frequency for automobile liability. General liability losses which lagged for 19-20 seem to have rebounded as ultimate losses were increased for 20-21 and also for a number of historical years. It will be a number of years before the effects of the pandemic are known.

Section 2

Considerations

Background

Oklahoma Schools Insurance Group was formed in 2002 to insure the liability and property exposures for member school districts in the state of Oklahoma. The group purchases excess insurance above a retention layer that varies by line of coverage. Arthur J. Gallagher Risk Management Services, Inc. manages OSIG. Select Actuarial Services has provided actuarial consulting services for OSIG, including loss forecasting and reserving studies since 2002.

Scope

Select Actuarial Services has prepared this report for OSIG at the request of Jennifer McKenzie of Arthur J. Gallagher Risk Management Services, Program Manager for OSIG. The specific objectives are (a) to estimate ultimate and outstanding losses and ALAE for the group's property and liability experience as of December 31, 2020 and projected to June 30, 2021; and (b) to analyze the variability inherent in the losses by deriving estimates at various percentiles or confidence levels.

This report is an actuarial analysis of data, conditions, and practices communicated as of January 26, 2021, to Select Actuarial Services as described in this report. While Select Actuarial Services believes these communications to be reliable, it has not attempted to audit the information and cannot guarantee the accuracy of any information supplied. However, the data have been reviewed for reasonableness and internal consistency, comparing the claims experience from year to year, and comparing to prior evaluations.

We have not anticipated any extraordinary changes to the social, legal and economic environment that may affect the frequency, cost or future reporting and settlement patterns of claims. In addition, our estimates do not include any provision for future claims arising out of causes not represented in the current data.

Use and Distribution

The actuarial estimates in this report are based upon appropriate actuarial assumptions and procedures described in the section of this report entitled "Description of Exhibits." Select Actuarial Services assumes no responsibility for any loss or damage that might arise from the use of or reliance upon this report other than for the purposes set forth herein.

This report was prepared for the use of and is only to be relied upon by the management of Oklahoma Schools Insurance Group. This report may also be provided to OSIG's auditors and insurance brokers. No portion of the report may be provided to any other party without Select Actuarial Services' prior

consent. In the event that such consent is provided, the report must be provided in its entirety. We recommend that any such party have its own actuary review this report to ensure that the party understands the assumptions and uncertainties inherent in our estimates.

Qualifications and Standards of Practice

Laura Sprouse is a Fellow of the Casualty Actuarial Society and a Member of the American Academy of Actuaries. She meets the Qualification Standards of the American Academy of Actuaries to render actuarial opinions for property/casualty reserves. This report is prepared in accordance with Actuarial Standards of Practice No. 23, *Data Quality*, No. 41, *Actuarial Communications*, and No. 43, *Property/Casualty Unpaid Claim Estimates*.

Coverage

OSIG began writing automobile liability, general liability, errors & omissions, auto physical damage and property coverage for member school districts in the state of Oklahoma in 2002. The Group retains \$100,000 combined loss and ALAE for liability losses per occurrence, above the member deductibles, which vary by member and by year. OSIG is further protected by aggregate coverage.

The group initially retained property losses of \$200,000 per occurrence for wind/hail related claims and \$100,000 for all other perils. Beginning with the 7/1/11-12 policy year, the per occurrence retention increased to \$250,000 for losses, with OSIG retaining most of the ALAE. Coverage also included a corridor deductible above the \$250,000 retention. Effective with the 7/1/19-20 policy year, the per occurrence retention for wind/hail related claims increased to \$500,000, and increased to \$750,000 for the 7/1/20-21 year.

Available Data

Loss information was provided by Jennifer McKenzie, Program Manager for OSIG. This loss information included detail loss runs as of December 31, 2020 and at prior annual evaluations. Exposure data for each member was provided and included vehicle counts, student population and total insured value.

Development

Development is the process in which losses and claim counts for a given accident period change over time. Development is caused by late reporting of claims, case reserve changes, claims reopening, and actual payment and settlement of claims.

Ideally, a client's own patterns should be utilized whenever possible to reflect the client's unique claims administration, reporting procedures, and so forth. Since several historical valuations of the data were available, we have selected patterns based on OSIG's development, supplemented with a benchmark for Oklahoma public entities. A curve-fitting technique is used to smooth and extrapolate the observed development patterns.

Actuarial Central Estimate

The estimates of ultimate losses at the “expected” level in this analysis are actuarial central estimates - estimates that represent an expected value over the range of reasonably possible outcomes. Such a range of reasonably possible outcomes may not include all conceivable outcomes. For example, it would not include conceivable extreme events where the contribution of such events to an expected value estimate is not reliably measurable.

Loss Models

Statistical distributions are often used by the insurance industry to model the loss generating process. In this analysis, the lognormal probability distribution has been used to model the required reserves. This technique allows for the projection of ultimate losses at the expected level and at various confidence levels or percentiles. The variation estimated in this modeling technique is the variation inherent in the historical experience; it does not include potential variation due to unanticipated changes in the environment or to misestimation of parameters. A Monte Carlo simulation was used to estimate the percentiles for the combined loss distributions for liability and property. This process randomly generates 10,000 sample outcomes for OSIG. The percentiles are based on these outcomes. For example, the 75th percentile estimate is a value that 7,500 of the outcomes are less than.

Discounting

OSIG does not discount its loss reserves.

Subrogation and Recoveries

We have used data net of recoveries other than excess and member deductibles throughout this analysis. The effect of such recoveries is therefore implicit in our calculations and no other reductions for collateral sources other than excess insurance and deductibles have been incorporated into the estimates.

Definitions

Accident Period: All of the events with occurrence dates during a period specified make up the corresponding accident period. The dollars associated with those events total the accident period's losses, although they may be paid long after the end of the accident period. Losses are grouped by accident period throughout our analyses.

Ultimate Losses: The total amount that will eventually be paid on all losses for a particular accident period. Our estimate of the ultimate losses for an accident period is the sum of the paid losses, the case reserves, and the IBNR reserve.

Paid Losses: Dollars paid as of the latest available evaluation on losses incurred through the latest available evaluation.

Case Reserves: Reserves established on individual claims by the claims adjusters, as of the latest available evaluation. The case reserve plus the amount paid to date represents the adjuster's best estimate of the ultimate value of a particular claim.

Reported Losses: Paid losses plus case reserves as of the latest available evaluation.

IBNR Reserve: ("Incurred But Not Reported") This is the dollar amount which we estimate will be added to the reported losses between the date when the losses were compiled and final settlement of all claims for the accident period. Some of these additional dollars will be added to claims which are already known and currently open but which will finally cost more than they are currently reserved for. Other of these dollars are associated with claims which are known and closed but will be reopened before final closure. The balance of the IBNR reserve is for late-reported events.

Outstanding Losses: The losses not yet paid. Outstanding losses equal the difference between the ultimate losses and the paid losses. They are also the sum of the case reserves and the IBNR reserve.

Loss Development: The change in the paid losses or the reported losses over time. As more information is provided, individual claim estimates get closer and closer to the ultimate value of the claims. The increase in the total reported losses through time is the reported loss development. Similarly, as losses are paid out over time, the increase in total paid losses is the paid loss development.

Section 3

Description of Exhibits

Actuarial procedures employed to project ultimate and outstanding losses consist of a number of steps. Exhibits representing the various steps in the process are explained in this section of the report.

Exhibit 1: Summary of Data

Exhibit 1-A summarizes the number of reported claims, open claims, paid and reported losses, and exposures for each accident period evaluated as of December 31, 2020. In this Exhibit, all losses are shown gross of per occurrence retentions, but net of member deductibles.

Exhibit 1-B contains a listing of large claims that are expected to exceed the retention in effect during each claim's accident period. The applicable retentions are discussed in the "Considerations" section of this report.

In Exhibit 1-C, limited paid and reported losses are calculated by capping each claim at the applicable retention level for each accident period.

Exhibit 2: Estimation Methods for Ultimate Losses

In Exhibit 2, reported and paid losses are developed to ultimate using various standard actuarial methods. Exhibit 2-A displays the reported and paid loss development methods. These methods apply the loss development factors derived in Appendix A to the reported and paid losses from Exhibit 1. Any individual claims which are expected to exceed the historic retention are first deducted from the aggregate losses before the factors are applied. Then a provision for the large claims equal to the retention plus an allowance for the probability of an as yet unreported large loss is added to the developed small losses to derive estimates of limited ultimate losses.

In Exhibit 2-B, the Bornhuetter-Ferguson methods are used to calculate additional estimates of ultimate losses. These methods, also referred to as the estimated unpaid and estimated unreported methods, combine the previous estimates of ultimate losses with current paid and reported losses to produce a blended estimate. The purpose of the Bornhuetter-Ferguson method is to dampen the effect of short-term swings in reporting and payment patterns that may not be reflective of long-term development. The estimates of ultimate losses for each policy year from the previous actuarial report are used as the *a priori* estimates for those years.

Property losses for years 7/1/11-12 through 7/1/20-21 are estimated both limited to the per occurrence retentions and on an unlimited basis.

Exhibit 3: Selection of Ultimate Losses

The results of the estimation methods are compared in Exhibit 3, along with the prior estimate. A selection of our best estimate of the ultimate cost for each accident period is made based on the reasonableness of the various estimates when compared to loss experience to date, and the reasonableness of the estimates of ultimate losses and resulting unreported losses from year to year.

For Property, we have selected ultimate losses limited to the retention and unlimited. The difference in these estimates is compared to estimate the ultimate losses within the corridor.

Exhibit 4: Comparison to Previous Actuarial Report

Exhibit 4 compares the current loss experience with projections based on previous actuarial studies. A comparison of this actual versus expected experience can help pinpoint changes in the ultimate losses and serves as a check of reasonableness. Exhibit 4-A compares to the 6/30/2020 study and Exhibit 4-B compares to the 1/31/2020 study.

Exhibit 5: Outstanding Losses

Ultimate and outstanding losses as of December 31, 2020, are shown in Exhibit 5-A. Limited paid losses are subtracted from the ultimate losses to estimate outstanding losses. Similarly, limited reported losses are subtracted from the ultimate losses to estimate the IBNR reserves.

Exhibit 5-B shows the outstanding losses projected to June 30, 2021. The reported and paid losses as of June 30, 2020 are projected using the loss development factors in Appendix A.

Exhibit 6: Historical Summary

This exhibit shows the ultimate number of claims, average claim size (severity), the rate of claims per \$1M payroll (claim frequency) and the rate of ultimate losses per exposure unit.

Appendix A: Loss and Claim Development Factors

Selected loss development factors are fit to an inverse power curve in Appendices A1 through A3, in order to extrapolate factors at the maturities needed. The selected factors are based on the triangles shown in Appendices A4-A6. In Appendix A7 we measure the variability in the reported loss development history in order to select parameters for the lognormal distributions for each accident year.

- Loss and policy information provided by Jennifer McKenzie, Arthur J. Gallagher Risk Management Services
Excess paid and incurred losses for closed claims are equal to the excess recoveries, or amounts over SIR if no recovery yet
Excess paid and incurred losses for open claims are amounts in excess of SIR regardless of recoveries.

Excess paid and incurred losses for closed claims are equal to the excess recoveries, or amounts over SIR if no recovery yet
Excess paid and incurred losses for open claims are amounts in excess of SIR regardless of recoveries.

\$200,000 SIR = Wind/Hail
\$100,000 SIR = other

RE: OSIG Actuarial Review as of 6/30/2021

Dear Jennifer,

The purpose of this review is to provide Oklahoma Schools Insurance Group (OSIG) with an update of the ultimate and outstanding losses, including an updated estimate of IBNR, as of June 30, 2021, based on the actual loss data as of June 30, 2021, and to revise the forecast ultimate losses for 7/1/21-22 based on the exposures written on July 1, 2021. I have compared the current data to the data used in the prior actuarial report as of December 31, 2020. For those accident periods where actual losses deviated from expected losses by a significant amount, the ultimate losses for those periods were increased or decreased accordingly. Since IBNR is calculated as the difference in the ultimate losses and the limited reported losses, the level of IBNR may fluctuate although ultimate losses may be relatively stable, or vice versa. Changes in ultimate losses generally track the changes in reported and paid losses compared to expectations. The overall change in ultimate losses is summarized below.

Change in Selected Ultimate Losses for years 02/03 through 20/21 Compared to Report as of 12/31/20	
Automobile Liability	-\$190,000
General Liability with E&O	-\$685,000
Property including APD	-\$466,000
Total	-\$1,341,000

Discussion of experience by line of business follows, including a reconciliation of the reserves as of June 30, 2021, to the preliminary estimate provided in the previous actuarial report.

Automobile Liability

The COVID-19 pandemic has led to reduced claim frequency for the 19-20 and 20/21 year and we have reduced the ultimate losses on these years by a total of \$200,000 since the preliminary report as of 12/13/2020. There was some adverse development on the 18/19 year, and we increased ultimate losses by this year by \$50,000. Smaller reductions were made to the 16-17 and 17-18 years. The net change to the ultimate losses since the 12/31/20 report is a reduction of \$190,000. The outstanding losses for automobile liability as of June 30, 2021, are estimated to be \$2,059,000 including \$1,639,000 in case reserves and \$420,000 in IBNR.

General Liability

Since the previous actuarial report as of 12/31/2020, reported losses have developed about \$756,000 less than expected. As a result, we have reduced the ultimate losses for each year from 15-16 through 20-21 by varying amounts totaling \$685,000. The outstanding losses for general liability as of June 30, 2021, are estimated to be \$6,256,000, including \$4,633,000 in case reserves and \$1,623,000 in IBNR.

The total reserve for the liability program is \$8,315,000, including \$6,272,000 in case reserves and \$2,043,000 in IBNR. There is a 25% probability that the IBNR reserves could exceed the 75th percentile estimate of \$2,819,000, and a 10% probability that they could exceed the 90th percentile estimate of \$3,711,000.

The table below shows the reconciliation of the projected reserves as of June 30, 2021, based on the prior report as of 12/31/20, compared to the actual year end reserves. Although the ultimate losses were decreased by \$875,000, the ending reserve requirement has increased from \$8,069,000 to \$8,315,000. This is because actual claim payments from 1/1-6/30/2021 were \$1,121,000 less than expected.

OSIG Liability Program Reconciliation to Prior Report	Actual as of 6/30/21	From Prior Report as of 12/31/20
Beginning Reserve as of 12/31/2020	\$8,655,000	\$8,655,000
Ultimate Losses Incurred 1/1- 6/30/2021	\$1,826,000	\$1,826,000
Payments During 1/1-6/30/2021	-\$1,291,000	-\$2,412,000
Change in Ultimate Losses	-\$875,000	\$0
Ending Reserve as of 6/30/2021	\$8,315,000	\$8,069,000

Property/Auto Physical Damage

On an unlimited basis, reported losses have increased 14.8% or about \$31.1 million since the previous actuarial study as of 12/31/2020. Within OSIG's retained layers the development was actually less than expected overall, although there was some adverse development on individual years. Policy years 13-14 and prior are all closed. We increased the ultimate losses for the SIR layer for years 16-17 and 18-19, but reduced them for years 14-15, 15-16, 17-18 and 19-20. The corridor has been exhausted for all periods. The total outstanding losses for property and auto physical damage are \$8,190,000 including \$5,714,000 in case reserves and \$2,476,000 in IBNR reserves. There is a 25% probability that the IBNR reserve need is \$4,148,000, and a 10% probability that the IBNR is \$5,916,000.

The table below shows that the actual reserve need as of June 30, 2021, is \$819,000 more than projected in the December study. Ultimate losses were decreased by \$466,000. Claim payments were \$1,285,000 less than expected.

OSIG Property/APD Program Reconciliation to Prior Report	Actual as of 6/30/21	From Prior Report as of 12/31/20
Beginning Reserve as of 12/31/2020	\$8,554,000	\$8,554,000
Ultimate Losses Incurred 1/1-6/30/2021	\$5,248,000	\$5,248,000
Payments During 1/1-6/30/2021	-\$5,146,000	-\$6,431,000
Change in Ultimate Losses	-\$466,000	\$0
Ending Reserve as of 6/30/2021	\$8,190,000	\$7,371,000

Forecast Losses for 7/1/21-22

We adjusted the forecast losses for 7/1/21-22 for the change in the amount of exposures to be written as of July 1, 2021. We applied the selected loss rates from the 12/31/20 actuarial report to the updated exposure estimates to derive the ultimate losses for the 7/1/21-22 year. Due to the ongoing pandemic the uncertainty in the forecast estimates is increased.

The liability forecast is for losses within OSIG's \$100,000 self-insured retention.

Forecast Losses for OSIG's Liability Program for 7/1/21-22 Losses Limited to \$100,000 per occurrence		
	Ultimate Losses	Loss Rate
<i>Automobile Liability</i>	\$1,571,000	\$114 per vehicle
<i>General Liability</i>	\$2,371,000	\$4.99 per student
Total Forecast	\$3.942,000	\$8.30 per student

The property program has changed for 7/1/21-22. OSIG will retain a \$25,000 maintenance deductible for each claim and then retains a \$25 million aggregate layer. Once the aggregate is exhausted, OSIG will have a trailing deductible of \$100,000 per occurrence. Certain APD claims will be retained by OSIG in their entirety. OSIG's losses will offset by the member deductibles. About five members are not participating in the property program but have purchased primary APD coverage with limits of \$100,000.

Forecast Losses for OSIG's Property Program for 7/1/21-22		
	Ultimate Losses	Loss Rate
<i>Primary APD only (5 members)</i>	\$83,000	\$90.26 per vehicle
<i>Property/APD \$25million Aggregate + \$25,000 maintenance deductible and \$100,000 trailing deductible Net of Member Deductibles</i>	\$28,510,000	\$0.144 per \$100 TIV
<i>Property/APD Estimated Member Deductibles</i>	\$1,917,000	\$0.010 per \$100 TIV

Description of attached Tables and Exhibits

Table A summarizes the ultimate and outstanding losses by policy year. The outstanding losses are broken down between case reserves and IBNR. Table B shows the percentile estimates of the IBNR reserve and total reserve. Table C shows the comparison of experience between

12/31/2020 and 6/30/2021. Table D summarizes the forecast losses and Table E displays the percentile estimates for losses with various layers of insurance.

We have also included Exhibits 4 and 5 for automobile liability and general liability to show the changes in these individual coverages and the resulting IBNR and outstanding losses.

It has been a pleasure working with you on this year-end review. If you have any questions, please do not hesitate to call me. We also can answer questions from your auditors as they arise.

Sincerely,

Statement of Actuarial Opinion
Net Retained Liabilities as of June 30, 2021
Premium Adequacy for the Policy Year 7/1/21-22

Oklahoma Schools Insurance Group

I, Laura T. Sprouse, am an independent consultant to Oklahoma Schools Insurance Group (OSIG). I am a Fellow of the Casualty Actuarial Society and a Member of the American Academy of Actuaries and meet the Academy’s qualification standards for prescribed Statements of Actuarial Opinion. Although no formal appointment was made by the Board of Directors of OSIG, I have been asked to opine on the adequacy of the loss and loss adjustment expense reserves as of June 30, 2021, and the adequacy of premiums for the 7/1/21-22 policy period. This opinion is prepared in accordance with Actuarial Standards of Practice No. 36, *Statements of Actuarial Opinion Regarding Property/Casualty Loss and Loss Adjustment Expense Reserves*, No. 43, *Property/Casualty Unpaid Claim Estimates*, and No. 53, *Estimating Future Costs for Prospective Property/Casualty Risk Transfer and Risk Retention*.

Loss and ALAE Reserves as of June 30, 2021

I have examined the reserves listed below and in the financial statements of the Oklahoma Schools Insurance Group as prepared for filing with state regulatory officials as of June 30, 2021. These amounts represent the estimates by management of OSIG for all unpaid losses and the related loss adjustment expenses as of June 30, 2021.

Net Liabilities for Losses and ALAE as of June 30, 2021	
Net Unpaid Losses and Loss Adjustment Expenses	\$13,478,166
Incurred But Not Reported Reserves	\$4,519,000
Total Net Unpaid loss and ALAE reserves	\$17,997,166

In forming my opinion on the loss and loss adjustment expense reserves, I relied upon data provided by Jennifer McKenzie, Program Manager for OSIG, valued through June 30, 2021. I evaluated that data for reasonableness and consistency through comparison to previous reports. In other respects, my examination included such review of the actuarial assumptions and methods used and such tests of the calculations as I considered necessary.

SelectActuarial.com

My own analysis produced a central estimate of the outstanding losses of \$16,505,000 as of June 30, 2021, including \$11,985,983 in case reserves and IBNR reserves of \$4,519,000. My estimate is about \$1,492,183 lower than OSIG's carried reserves. My understanding is that OSIG updates the case reserve values using losses valued as of September 30, 2021.

Opinion on Reserves

In my opinion, the amounts recorded in the financial statements of OSIG:

- Meet the requirements of the insurance laws of the state of Oklahoma.
- Are consistent with the reserves computed in accordance with accepted actuarial standards of practice.
- Make a reasonable provision for all unpaid loss and loss adjustment expense obligations of OSIG under the terms of its contracts and agreements.

Risk of Material Adverse Deviation

Due to the nature of third-party liability claims and OSIG's relatively large retention, it is possible that OSIG could experience a fluctuation of material size from the expected outstanding losses. Note the significant development between June 30th and September 30th as an example. To the extent that this is not captured in the loss development patterns, there is some risk that IBNR reserves are inadequate. However, such losses would be capped to \$750,000 maximum per occurrence, and the corridor deductible has already been exhausted for each of the last six years. We have selected a materiality threshold of \$2,782,000 or 20% of surplus. While it is possible that losses could develop by more than \$2,782,000, this amount of adverse deviation is not likely. Therefore, I would conclude there is not a significant risk of material adverse deviation.

Premium Adequacy for the 7/1/21-22 Policy Period

My analysis produced a forecast of the ultimate retained losses for the period 7/1/21-22 of \$32,535,000. OSIG has budgeted roughly \$43,083,000 for reinsurance premiums and other expenses for a total premium need of \$75,618,000. OSIG expects to collect about \$76,221,000 in member contributions and earn another \$205,000 in investment income. Thus, there is an expected profit of \$808,000. It is my opinion that the premiums for 7/1/21-22 are adequate.

Actuarial Reports

This opinion was based on the actuarial study for OSIG dated April 21, 2021, and the update dated October 5, 2021. The two documents together constitute the actuarial report for OSIG for the fiscal year ending June 30, 2021.

This opinion was prepared solely for the purpose of filing with regulatory agencies and is not intended for any other purpose.

Best regards,

Certificate of Coverage

This is to certify the school district named below is a participant in the Oklahoma Schools Insurance Group (OSIG) effective during the coverage period indicated.

Member: Salina ISD
 Box 98
 Salina, OK 74365

Plan Number: OSIG-2021

Coverage Period: 07/01/2021 12:01 am to 07/01/2022 12:01 am

Commercial Property Coverage

Property limits are per occurrence. Limits are shared by OSIG members and subject to Statement of Values.

Real And Personal Property - Limit Per Occurrence	\$700,000,000
Replacement Cost (ACV on roofs over 15 years old, Contractors Equipment and Debris Removal Only)	
Exclusion - Cosmetic loss to metal roof coverings caused by hail	
Buildings - 125% of Scheduled Limits per Statement of Values	
Business Personal Property - Blanket Coverage Per Statement Of Values	
Earthquake Limit - Per Occurrence and Aggregate	\$10,000,000
Flood Limit - Per Occurrence and Aggregate (Excludes Flood Zones A and V)	\$25,000,000
Terrorism	\$500,000,000
Property Deductible - Each Occurrence	\$2,500
Wind/Hail Deductible - Each Occurrence	\$5,000
Flood and Quake Deductible - Each Occurrence	\$50,000
Terrorism Deductible Per Occurrence	\$10,000

Boiler & Machinery

Boiler and Machinery Coverage As Per Statement of Values	\$200,000,000
Boiler And Machinery Deductible - Each Occurrence	\$1,000

School Violent Acts Protection

Each Occurrence Limit	\$25,000
Aggregate Limit (all members, all claims)	\$250,000
Property/Safety Improvements Following School Violent Act	\$25,000
Deductible	\$0

General Liability-Per Occurrence

(Subject to Governmental Tort Claims Act)	\$1,000,000
Bodily Injury, Property Damage and Personal/Advertising Injury	
Premises/Operations and Products/Completed Operations	
Miscellaneous Medical Professional	

Employee Benefits Liability Coverage - Claims Made

Employee Benefits Liability - Per Occurrence	\$1,000,000
--	-------------

<u>Educators Liability - Per Occurrence - Claims Made</u>	\$1,000,000
(Subject to Governmental Tort Claims Act)	
Employment Practices	
Errors And Omissions Liability including Educational Errors And Omissions	
IEP Hearing	\$25,000
Unlimited Prior Acts (excluding known incidents/claims)	
Deductible	\$2,500

(Subject to Governmental Tort Claims Act)	
Bodily Injury/Property Damage	
Uninsured Motorist (Oklahoma Minimum Limits)	
Hired And Non Owned Automobile Liability	
Garage Liability	
Auto Liability Property Damage Deductible	\$1,000
<u>Automobile Physical Damage</u>	
Actual Cash Value	
Other Than Collision And Collision Deductible	\$1,000
Garage Keepers Legal Liability Coverage	\$125,000
Garage Keepers Legal Liability Deductible	\$1,000
<u>Crime Coverage</u>	
Employee Dishonesty - Limit Per Occurrence	\$10,000
Money And Securities - On Premises	\$10,000
Money And Securities - Off Premises	\$10,000
Deductible	\$1,000
<u>Cyber Liability</u> - Claims Made - Retro Date first Cyber coverage effective date with OSIG	
Liability:	
Limits are annual aggregate for each insured/member	
Information Data & Network Liability	\$2,000,000
Regulatory Defense and Penalties	\$2,000,000
Payment Card Liability	\$2,000,000
Media Liability	\$2,000,000
First Party Computer Security:	
Limits are policy aggregate sublimits	
Cyber Extortion Loss	\$2,000,000
Data Recovery Costs	\$2,000,000
Business Interruption Loss Resulting in Security Breach	\$2,000,000
Business Interruption Resulting in System Failure	\$500,000
Deductible - Per Occurrence	\$10,000
<u>Pollution Liability</u> - Claims Made	
Per Pollution Incident	\$2,000,000
Microbial Matter Sublimit	\$500,000
Deductible - Per Pollution Incident	\$50,000

This Certificate of Coverage form is an outline of the coverages provided through OSIG. It does not include all the terms, coverages, exclusions, limitations, and conditions of the actual contract language.

Claims Reporting

When you experience a claim of any nature, it is important to notify your insurance agent as quickly as possible. It is equally important to provide your agent with as much information about the loss as possible. Your agent will then report your claim to OSIG. Of course, if your agent is unavailable, your claim can be directly reported to the OSIG administrative claim team at Gallagher.

Your report should include as much of the following information as you can gather:

- Type of claim (fire, windstorm, auto accident, etc.).
- Brief description of how claim occurred.
- Description of damaged property (building location, vehicle, etc.).
- Was anyone injured? If yes, include names, addresses, home and work phone numbers, including cell phone number, or other contact information and the description of the damaged property.
- Be sure and get the full contact information for any witnesses.
- If a police report was completed, be sure the name of the police department and their case or report numbers is included.

Prompt claim reporting is key in mitigating damages and also in reducing your exposure to litigation. OSIG depends on you to include all available information in an expeditious manner, as this valuable documentation will be used in defending OSIG cases. If you have any questions about reporting a claim to OSIG or if you need to report a claim, please contact us at 866-444-0061 or osigclaims@ascrisk.com.
